**3D CREATIONS**

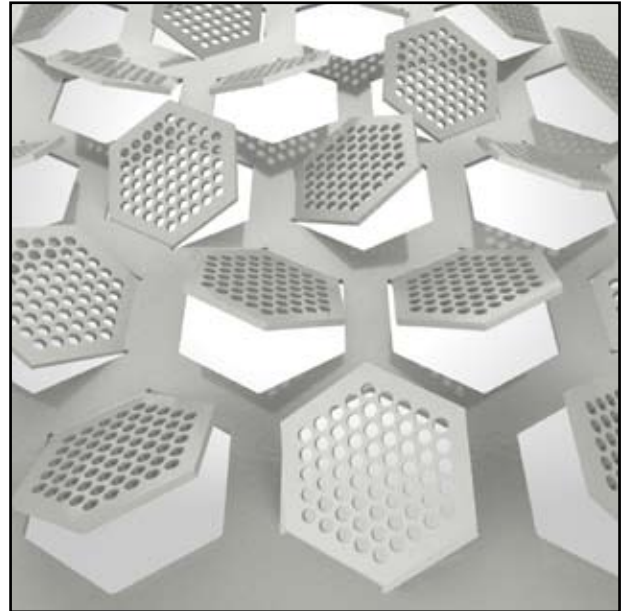

# FORMING OUR FUTURE

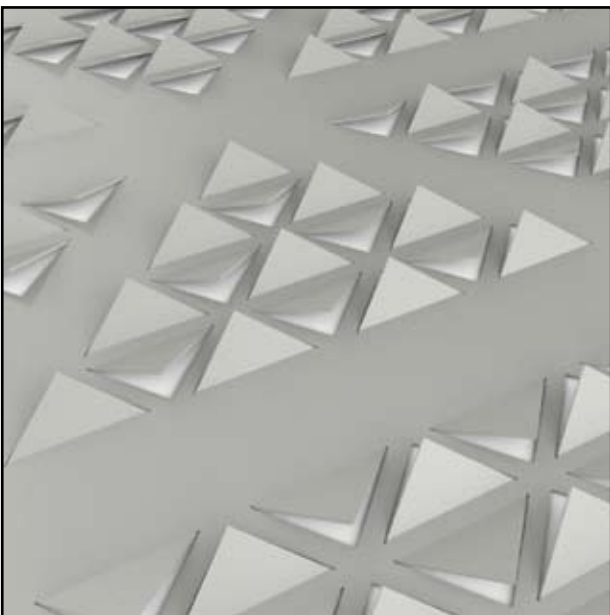

Whether you are looking to make a statement or just seeking something different, the new Metrix Group® 3D Creations can dramatically enhance interior and exterior environments while providing thermal benefits.

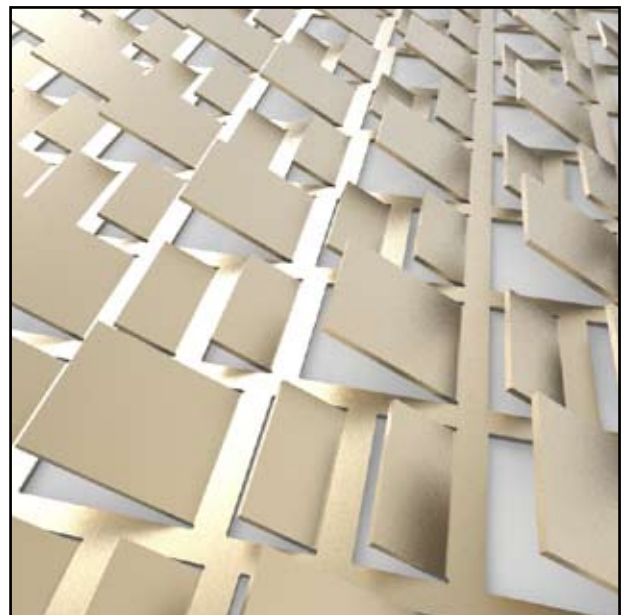

Formed shapes can be rotated up to 360° providing interesting variations across the panel.

Formed shapes can be perforated to provide additional ventilation, visibility, or decorative effect.

Patterns can be created using different size and shaped forms.

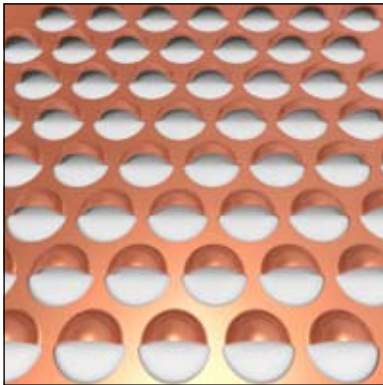

The form height can be varied creating a ripple effect.

## CUSTOMISABLE PRODUCT FEATURES

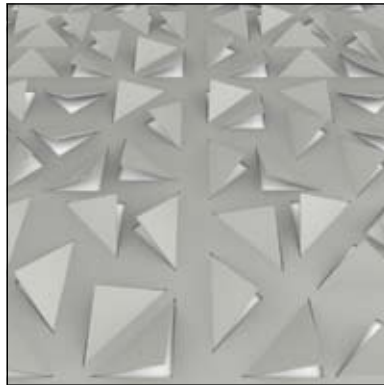

The 3 dimensional surfaces create interesting shadows across the contoured surface. These patterns are fully customisable giving the opportunity to make a bold statement or blend in with their surroundings.

# ONLINE QUOTING & SPECIFICATION

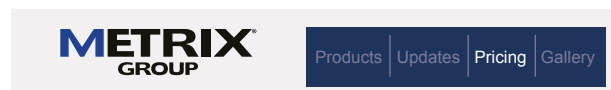

Metrix® Group's new online quoting and specification tool has revolutionised information requests for architects, builders, and contractors.

This innovative tool provides a 10 minute enquiry response time. Taking an average of 2 minutes to fill in this tool is one of the easiest ways to obtain a pricing estimate with specification details any time of day or night.

**Follow the 3 easy steps to obtain a price estimate with specification details in 10 minutes.**

**1** Visit [www.metrixgroup.com.au](http://www.metrixgroup.com.au) and click on **pricing**.

**3** 10 minutes later you have your pricing estimate with project specific specification details, estimated lead time to manufacture, selected fixing system, and surface finish.

**2** Lodge an online pricing request entering contact details, project information, and product required.
